Explanation for Aspen Leaf Design:

Hand forged aspen leaves set the scene for an asymmetrical design. (Examples of hand forged aspen leaves can be seen in the artist's previous work under pictures of previous work.) The final finish will be powdercoated and weather durable. This scene depicts the areas natural beauty of aspen leaves, but also the history of Aspen, Colorado which is steeped in the history of architectural blacksmithing. (see: story). A side view, which repeats the design, is presented in the drawing as well.
